# MANAGEMENT DISCUSSION AND ANALYSIS

## OVERVIEW

The Group is principally involved in the manufacture and distribution of corrugated cartons in Malaysia, Vietnam and Myanmar. The Group also has non-active subsidiaries in Malaysia, Singapore and Indonesia. The Group’s business objective is to manufacture quality carton boxes that meet customers’ requirements in South East Asia.

The Group reported a lower revenue in FYE 2023 as our operations in Vietnam have been weighed down by the weak global demand for paper cartons and the stabilisation of the prime raw materials cost i.e. paper roll, has led to a lower average selling price in the Group. As a result, a 15.9% reduction in revenue was recorded in FYE 2023.

## MANAGEMENT DISCUSSION AND ANALYSIS

### FINANCIAL PERFORMANCE

Summary of the financial performance of the Group for FYE 2023 as compared to the financial year ended 31 December 2022 ("FYE 2022") are as follows:

	FYE 2023 RM'000	FYE 2022 RM'000	(Decrease)/Increase RM'000	%

No. of Shares in issue ('000)	120,047	120,047	–	–

The revenue of the Group decreased by 15.9% to RM644.4 million in FYE 2023 as compared to RM765.8 million reported in FYE 2022. The lower revenue was affected by reduction in sales volume in Vietnam and Malaysia as well as lower average selling price following the stabilisation of global supplies of the prime raw material, paper rolls.

The Group registered a lower GP in FYE 2023 at RM59.4 million as compared to RM64.1 million in FYE 2022. The decrease in GP was primarily driven by lower sales volume and lower average selling price.

With the lower revenue and GP, the Group reported a higher LBT of RM5.9 million in FYE 2023 as compared to a LBT of RM2.9 million in FYE 2022.

# MANAGEMENT DISCUSSION AND ANALYSIS

## FINANCIAL PERFORMANCE (continued)

### *Malaysian entities*

Contributions from entities in Malaysia are as follows:

	FYE 2023 RM'000	FYE 2022 RM'000	(Decrease)/Increase RM'000	%
Revenue	174,679	181,087	(6,408)	(3.5)
LBT	(451)	(7,997)	(7,546)	(94.4)

The manufacturing facilities in Malaysia are located in Batu Caves, Selangor and Senai, Johor.

The Malaysian entities recorded lower revenue in FYE 2023 at RM174.7 million as compared to FYE 2022 at RM181.1 million due to lower sales volume and average selling price, which was adjusted to be in line with the declining price of the raw material, paper rolls.

A lower LBT of RM0.5 million was recorded in FYE 2023 as compared to RM8.0 million in FYE 2022. The improvement was due to improvements in GP margin and operating efficiencies and lower general and administration expenses. The loss in FYE 2022 was due to inventories written off and impairment loss on receivables of RM6.0 million and RM1.0 million respectively.

### *Vietnam entities*

Contributions from entities in Vietnam are as follows:

	FYE 2023 RM'000	FYE 2022 RM'000	(Decrease)/Increase RM'000	%
Revenue	423,766	540,672	(116,906)	(21.6)
Profit before taxation ("PBT")	778	10,337	(9,559)	(92.5)

The manufacturing facilities in Vietnam are located in Ho Chi Minh City and Hanoi City.

The Vietnam entities recorded lower revenue in FYE 2023 at RM423.8 million as compared to FYE 2022 at RM540.7 million due to lower sales volume which was weighed down by the weak global demand that has been affecting Vietnamese businesses and lower average selling price. The Vietnam economy has been struggling broadly with lower demand in its key export markets that in turn weighed on its manufacturing industry.

Consequently, the Vietnam entities recorded a lower PBT of RM0.8 million in FYE 2023 as compared to a PBT of RM10.3 million in FYE 2022.

# MANAGEMENT DISCUSSION AND ANALYSIS

## FINANCIAL PERFORMANCE (continued)

### Myanmar entity

	FYE 2023 RM'000	FYE 2022 RM'000	Increase/(Decrease)	
			RM'000	%

The improvement in the results was attributed to the improved average selling price in FYE 2023.

With the increase in sales revenue and GP, the entity recorded a lower LBT of RM5.7 million in FYE 2023 as compared to a LBT of RM6.7 million in FYE 2022.

## STRATEGIC ANALYSIS

### Overall market analysis and outlook

Corrugated cartons are used in a wide variety of industries worldwide as primary and secondary packaging materials. The market demand for the Group's products is dependent on the economic situation in Malaysia, Vietnam and Myanmar.

The product specifications may differ from country to country, from industry to industry and from customer to customer. The Group's objective is to supply carton boxes which our customers want at a price acceptable to them.

In Malaysia, the corrugated carton industry is a matured industry with numerous players. The Malaysian Corrugated Carton Manufacturer's Association which is the trade association representing the industry, has more than 50 members and associate members.

Apart from a handful of integrated corrugated carton manufacturers who also manufacture paper rolls, there are also a handful of corrugated carton manufacturers with size and capacity comparable to the Group's operations in Malaysia, Vietnam or Myanmar. There are also downstream players who are pure converters where they source paper boards from corrugators and supply carton boxes to their customers.

In Malaysia, the Group focuses its sales effort on fast-moving consumer products where high quality carton boxes are consistent in demand. The Group also sells its products to food and beverages, furniture, edible oil and other industries.

# MANAGEMENT DISCUSSION AND ANALYSIS

## STRATEGIC ANALYSIS (continued)

### *Overall market analysis and outlook (continued)*

In Vietnam, the carton box industry is a matured industry with a high number of players. Apart from manufacturers of similar size, the Group's operations in Vietnam are also competing with large integrated carton box manufacturers as well as smaller converters. The Group in Vietnam focuses its attention on fast-moving consumer products and those in the electronic & electrical, furniture and footwear industries and the quality standards expected are significantly higher.

In Myanmar, there are more than 10 carton box manufacturers. Demand for corrugated cartons is expected to increase when its economy reaps benefits from foreign direct investment into the country. Currently, the entity in Myanmar focuses its attention on fast-moving consumer products such as food and beverages and footwear industries which have a high demand for our products and the quality standards expected are significantly higher.

Due to the presence of a high number of manufacturers in Malaysia, Vietnam and Myanmar, competitions in these markets are intense and the profit margin is expected to be thin but reasonable.

### *Customer concentration*

The revenue stream of the Group is quite diversified. In FYE 2023, none of the customers contributed more than 10% of the Group's revenue. However, a significant portion of the Group's revenue is concentrated in the food and beverage industry.

The Group also manufactures carton boxes for edible oil industry, electronic & electrical industry, footwear and furniture industry. The Group also sells paper board to converters. The Group will continue to develop new customers and new market segments in order to diversify and expand its customer base.

### *Credit risks*

It is the industry norm to sell carton boxes to customers on credit. The Group typically grants credit terms of between 14 to 120 days, subject to a credit limit set upon evaluation of the creditworthiness of each customer.

Credit terms and limits are evaluated annually and ageing reports are reviewed monthly to identify slow-paying customers so that appropriate action can be taken to recover debts in a timely manner.

Where appropriate, some of the trade receivables in Malaysia are covered by trade insurance policy to reduce the exposure to bad and doubtful debts. Some of these trade receivables are discounted and sold to a financial institution to improve the cash flows of the Group.

A summary of debtors ageing together with a list of long outstanding customers are presented to the Audit and Risk Management Committee ("ARMC") for review on a quarterly basis.

On a regular basis, evaluations will be carried out to write-off bad debts, if any, and to provide for impairment for debts exceeding credit period, as appropriate. Please refer to Note 12 of the financial statements for receivables ageing analysis.

### *Direct materials*

Paper rolls are the main material used in the production of carton boxes.

In Malaysia, there are only a handful of reliable local paper suppliers from whom the Group purchases its paper rolls. The Group also imports certain types of paper rolls subject to 0% to 10% import duty. In addition, the importation of paper rolls may expose the Group to foreign currency exchange risk.

# MANAGEMENT DISCUSSION AND ANALYSIS

## STRATEGIC ANALYSIS (continued)

### *Direct materials (continued)*

Similarly in Vietnam, the Group works with a handful of reliable local suppliers whom the Group sourced for its paper requirements. Some other paper rolls can be imported, subject to an import duty of between 0% to 20%.

Major suppliers of paper rolls in Malaysia and Vietnam are also producers of corrugated carton and hence, have a competitive advantage over the Group in the market place.

In Myanmar, the Group, besides importing paper rolls at zero import duty, was also able to procure domestic supplies of paper rolls to cater for production.

### *Cost of direct materials*

The main cost component of corrugated carton is paper rolls.

Although majority of paper rolls are sourced locally by the Malaysian and Vietnam entities, the cost of paper rolls mirrors those of international market as it is influenced by the market price of paper pulps and old corrugated cardboard ("OCC") price in the international market. Fluctuations in foreign currency exchange rate also have an impact on the price of paper rolls.

Supply of paper rolls in Malaysia and Vietnam is also dependent on the availability of capacity by local paper mills, some of which are controlled by the integrated paper mills.

### *Overhead costs*

Apart from direct materials, the Group incurred transportation, utilities, upkeep and other consumables costs (such as inks and glue) in the production of corrugated cartons.

### *Production and inventory management*

Due to the limitation on the supply of paper rolls, the Group kept a reasonable quantity of paper rolls in the factory to ensure a smooth production process.

Carton boxes are manufactured to order and specific to the customers, once produced. Excess quantities produced will be scrapped if there are no repeat orders from customers for the same item as cartons produced have a limited shelf life. However, to ensure efficiency in production, certain minimum production quantity needs to be achieved.

Hence, careful production planning is essential to ensure that excess quantities are minimised whilst production efficiencies are maintained.

On a regular basis, evaluations will be carried out to write off obsolete inventories and to provide for impairment for slow-moving inventory in accordance with the Group's policy.

### *Human capital*

The manufacturing of corrugated cartons is considered a labour-intensive industry. The Group employs a diversified workforce with various backgrounds, knowledge, skills and experience. The Group offers a reasonable remuneration package, tasked with attracting talents to join the Group and retaining the existing pool of experienced employees.

In Malaysia, the direct labour cost is affected by the minimum wage rate fixed by the Malaysian Government. The current minimum wage per month which was fixed in 2022 is RM1,500.

# MANAGEMENT DISCUSSION AND ANALYSIS

## STRATEGIC ANALYSIS (continued)

### *Human capital (continued)*

As the Malaysian entities rely on foreign workers from Nepal, Vietnam and Bangladesh to provide the labour required at the manufacturing facilities, additional expenses were incurred in ensuring compliance with Employee' Minimum Standards of Housing, Accommodations and Amenities (Accommodation and Centralised Accommodation) Regulation 2020 as introduced by Jabatan Tenaga Kerja.

In Vietnam, the Government of Vietnam has in force an annual minimum wage increase. In Ho Chi Minh City, the minimum wage per month was Vietnamese Dong ("VND") 4.68 million whereas in Hanoi City, it was VND4.16 million. The last revision was made in June 2022. In the year 2023, the Government of Vietnam withheld the minimum wage increase to cushion the impact on businesses and the economic conditions brought on by the pandemic.

In Myanmar, the minimum wage fixed by the Myanmar Government has increased by 21% from Myanmar Kyat ("MMK") 4,800 per day to MMK5,800 per day effective from 1 October 2023.

Apart from wages, training programs are held from time to time to develop and enhance the workers' skills in all plants. Emphasis is placed on our workers' awareness of occupational safety and health to promote a safe workplace.

Risk associated with the loss of key personnel are reviewed regularly and succession plans are managed for key roles.

### *Manufacturing facilities*

Production facilities, plants, machinery and equipment are essential parts of the business. They are subject to technological obsolescence and wear and tear. Hence, regular upgrades and maintenance are required to ensure that the assets can operate at the optimum level and reduce wastage. Inevitably, as the machinery and equipment age, it will be more costly to upkeep them.

In Malaysia, some of the key machinery used in the operations are more than 25 years old. Apart from capacity limitation, the availability of replacement parts and the cost of repair and maintenance are the key challenges the Management needs to manage.

Plant and machinery are subject to continuous expansion, upgrades and improvements to cater for customers' demands.

All manufacturing facilities, plant and machinery are adequately insured to protect the Group's interest in the event of any mishaps.

### *Liquidity and capital management*

The Group maintains a healthy level of cash and cash equivalents and committed credit facilities from financial institutions to fund the Group's short-term and long-term commitments. The Group also manages the repayment profile of the borrowings to reflect the ability to generate cash from its operations.

The Group's borrowings are principally denominated in the functional currency of the respective companies in the Group to match the currency of the repayment source. The Group's borrowings are subject to periodic review to ensure they are priced at competitive rates.

Excess funds, if any, are placed in interest-earning assets.

# MANAGEMENT DISCUSSION AND ANALYSIS

## STRATEGIC ANALYSIS (continued)

### *Liquidity and capital management (continued)*

As at 31 December, the net debts and total equity of the Group are as follows:

	2023 RM'000	2022 RM'000
Loans and borrowings	225,649	199,514
Lease liabilities	6,226	10,359
Less: Cash and bank balances	(75,855)	(42,363)
Net debt	156,020	167,510
Total equity	109,380	120,152
Net debt-to-equity ratio	1.43	1.39

Loans and borrowings of the Group increased by 13.1% in FYE 2023 due to increased trade borrowings to finance increased inventory holding to cater for upcoming sales demand in the next financial year.

Borrowings incurred by the Group exposed the Group to interest rate risk as they are priced based on a mixture of fixed and floating market interest rates.

### *Foreign currency exposures*

The Group's operating performance and cash flows are not expected to be severely impacted by fluctuations in foreign currency exchange rate as the majority of sales and purchases are denominated in the functional currencies in the respective countries, although purchases of machinery and equipment and certain paper rolls are denominated in United States Dollar ("USD").

However, due to the difference in functional currencies between the Malaysian entities and its foreign subsidiaries, the net assets value in Vietnam, Singapore and Myanmar are subject to foreign currency translation risk. These translation differences were accounted for in the "foreign currency translation reserve".

As at 31 December 2023, there is a credit balance of RM15.5 million in the foreign currency translation reserve account.

### *Environmental, Social and Governance ("ESG") rules*

Regulators are strengthening ESG-related rules. The transition to a low-carbon economy is emerging as a crucial conversation and a license to operate. The Group has an ESG roadmap, and has engaged customers, vendors and financial institutions in our effort to understand the decarbonisation requirements. This is addressed and reported in our Sustainability Report on pages 20 to 56 of this Annual Report.

# MANAGEMENT DISCUSSION AND ANALYSIS

## OTHER MATTERS

### ***Taxation***

The statutory tax rate in Malaysia, Vietnam and Myanmar is 24%, 20% and 22% respectively.

No consideration has been given to the prior year's tax losses incurred by the loss-making entities in Malaysia, Vietnam and Myanmar. The use of unutilised tax losses in these entities is subject to agreement of the tax authorities and compliance with certain provisions of the tax legislation of the respective countries in which these entities operate.

### ***Retirement benefit***

The Group operates an unfunded defined contribution retirement benefit program for its eligible employees. Actuarial valuation is carried out once in 3 years by an independent actuary to determine the cost of service to be accounted for. The last actuarial valuation was carried out in the FYE 2023.

### ***Related parties transactions***

The Group entered into related party transactions to:

- a. rent factory premises owned by a related company;
- b. borrow funds from and pay interest thereon to the immediate holding company and related companies; and
- c. sell products to its related parties in accordance with the mandate given by the shareholders in the Annual General Meeting held on 27 June 2023.

The related party transactions are subject to review regularly to ensure that they were entered into in the ordinary course of business on terms that the Directors considered comparable to transactions entered with third parties.

### ***Dividend***

No dividend was declared or proposed by the Directors for FYE 2023.

### ***Political upheaval in Myanmar***

The political upheaval in Myanmar which began in February 2021 has resulted in the state of emergency declared which disrupted the business environment initially. At this juncture, the Group has decided that it will continue to operate in Myanmar and adapt to any new requirements that may be imposed by the military government.

The Group will continue to assess the operational and financial impact of the political instability since ongoing developments remain uncertain and cannot be reasonably predicted. Nonetheless, the Group continues to monitor the development in Myanmar and be responsive to any changes in order to deliver sustainable and satisfactory results for the Group.

### (d) Human Resource and Code of Conduct Policies

There are documented policies and guidelines within the Group covering hiring and termination of employees, training programs, and performance appraisal to enhance the level of employees' competency in carrying out their duties and responsibilities. The Group has in place a Code of Conduct which is applied to the Group's management employees. The Code of Conduct defines rules of conduct and is structured as follows:

- compliance with laws and regulations,
- prevention of conflicts of interest,
- zero tolerance on bribery and corruption,
- safeguarding of the Group's intellectual property and assets,
- financial disclosure and importance of internal control implementation.

### (e) Insurance

Sufficient insurance coverage and physical safeguards on major assets are in place to ensure the Group's assets are adequately covered against any mishap that could result in material loss. A yearly policy renewal exercise is undertaken by management to review the coverage based on the current fixed assets register and the respective net book values and "replacement values", i.e. the prevailing market price for the same or similar item, where applicable.

### (f) ISO Audit

As per the requirement of the various ISO certifications, the scheduled audits are conducted internally as well as by various external certification bodies. Issues arising from these audits are forwarded to the Group Managing Director for discussion and further action, if any.

### (g) Internal Audit

The annual risk-based internal audit plan is reviewed and approved by the ARMC before the beginning of each year. The objectives of the said audit plan are to ensure, through regular internal audit reviews, that the Group's policies and procedures are being complied with to provide assurance on the adequacy and effectiveness of the Group's system of internal controls. Follow-up reviews on previous audit reports are carried out to ensure that appropriate actions are taken to address highlighted internal control weaknesses.

## STATEMENT ON RISK MANAGEMENT AND INTERNAL CONTROL

### INTERNAL CONTROL (continued)

The key elements of the Group's internal control system are described below: (continued)

#### (h) ARMC

The ARMC wholly comprises Independent Non-Executive members of the Board and provides direction and oversight over the internal audit function to enhance its independence from Management. The ARMC meets quarterly to review external audit findings, internal audit findings, discuss internal control issues, and ensure that weaknesses in controls highlighted are appropriately addressed by Management.

### REVIEW OF THE STATEMENT BY EXTERNAL AUDITORS

As required by Paragraph 15.23 of MMLR of Bursa Securities, the External Auditors have reviewed this Statement on Risk Management and Internal Control, and reported to the Board that nothing has come to their attention that causes them to believe that the Statement on Risk Management and Internal Control intended to be included in the Annual Report for FYE 2023 has not been prepared, in all material aspects, in accordance with the disclosures required by paragraphs 41 and 42 of the Statement on Risk Management and Internal Control: Guidelines for Directors of Listed Issuers, nor is the Statement on Risk Management and Internal Control factually inaccurate.

Their limited assurance review was performed in accordance with Malaysian Approved Standard on Assurance Engagements, ISAE 3000 (Revised) *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, and AAPG 3 *Guidance for Auditors on Engagements to Report on the Statement on Risk Management and Internal Control included in the Annual Report* issued by the Malaysian Institute of Accountants which does not require the External Auditors to form an opinion on the adequacy and effectiveness of the risk management and internal control systems of the Group.

### CONCLUSION

The Board is of the view that the risk management and internal control systems are satisfactory and have not resulted in any material losses, contingencies, or uncertainties that would require disclosures in this Annual Report.

This Statement is made in accordance with a resolution of the Board on 2 April 2024.

At the date of this report, the Directors are not aware of any circumstances:

- (i) which would render the amounts written off for bad debts, or the amount of the provision for doubtful debts in the Group and in the Company inadequate to any substantial extent, or
- (ii) that would render the value attributed to the current assets in the financial statements of the Group and of the Company misleading, or
- (iii) which have arisen which render adherence to the existing method of valuation of assets or liabilities of the Group and of the Company misleading or inappropriate, or

# **INDEPENDENT AUDITORS' REPORT**

## **TO THE MEMBERS OF BOX-PAK (MALAYSIA) BHD. (INCORPORATED IN MALAYSIA)**

### **Report on the Audit of the Financial Statements**

#### **Opinion**

We have audited the financial statements of Box-Pak (Malaysia) Bhd., which comprise the statements of financial position as at 31 December 2023 of the Group and of the Company, and the statements of profit or loss, statements of comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Company for the financial year then ended, and notes to the financial statements, including material accounting policy information, as set out on pages 91 to 156.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Group and of the Company as at 31 December 2023, and of their financial performance and their cash flows for the financial year then ended in accordance with Malaysian Financial Reporting Standards, IFRS Accounting Standards and the requirements of the Companies Act 2016 in Malaysia.

#### **Basis for Opinion**

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### *Independence and Other Ethical Responsibilities*

We are independent of the Group and of the Company in accordance with the *By-Laws (on Professional Ethics, Conduct and Practice)* of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and of the Company for the current financial year. These matters were addressed in the context of our audit of the financial statements of the Group and of the Company as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### **Key Audit Matter of the Group**

##### **1. Impairment assessment on the carrying amounts of property, plant and equipment and right-of-use assets**

As stated in Note 5(c) and Note 6.1(f) to the financial statements, certain subsidiaries have impairment indicators and they collectively held RM84,161,228 as the carrying amount of property, plant and equipment and RM15,608,927 as the carrying amount of right-of-use assets as at 31 December 2023.

Management used forecasted future cash flows in value-in-use model to determine the recoverable amounts of these property, plant and equipment and right-of-use assets (hereinafter referred to as Cash Generating Units ("CGUs")) to assess if there is any impairment loss required on the property, plant and equipment and right-of-use assets of these subsidiaries.

We determined this to be a key audit matter because it requires management to exercise significant judgement and estimates about the future results and key assumptions applied to the cash flow projections of the CGUs in determining their recoverable amounts. These key assumptions include forecast growth in future revenues and operating profit margins, as well as determining an appropriate pre-tax discount rate and growth rates, which are, among others, dependent on forecasted economic conditions.

### Key Audit Matters (continued)

#### Key Audit Matter of the Group (continued)

#### 1. Impairment assessment on the carrying amounts of property, plant and equipment and right-of-use assets (continued)

##### *Audit response*

Our audit procedures included the following:

- (a) compared cash flow projections against recent performance and assessed and evaluated the key assumptions used in the cash flow projections by comparing to actual historical operating profit margins and growth rates;
- (b) compared prior period budgets to actual outcomes to assess reliability of management's forecasting process;
- (c) assessed appropriateness of pre-tax discount rates used for each CGU by comparing to the weighted average cost of capital of the Group and relevant risk factors; and
- (d) performed sensitivity analysis to stress test the key assumptions in the impairment model.

#### Key Audit Matters of the Company

#### 1. Impairment assessment of the carrying amounts of costs of investments in subsidiaries

As stated in Note 8(c) to the financial statements, certain subsidiaries have impairment indicators and the net carrying amount of costs of investments amounted to RM52,933,000 as at 31 December 2023.

Management had performed impairment assessments on these subsidiaries/Cash Generating Units ("CGUs") and used forecasted future cash flows in value-in-use model to compute the present value of forecasted future cash flows for these subsidiaries/CGUs to determine if there is any impairment loss required on the costs of investments in these subsidiaries.

We determined this to be a key audit matter because it requires management to exercise significant judgement and estimates about the future results and key assumptions applied to the cash flow projections of these subsidiaries/CGUs in determining their recoverable amounts. These key assumptions include forecast growth in future revenues and operating profit margins, as well as determining an appropriate pre-tax discount rate and growth rates, which are, among others, dependent on forecasted economic conditions.

##### *Audit response*

Our audit procedures included the following:

- (a) compared cash flow projections against recent performance and assessed and evaluated the key assumptions used in the cash flow projections by comparing to actual historical operating profit margins and growth rates;
- (b) compared prior period budgets to actual outcomes to assess reliability of management's forecasting process;
- (c) assessed appropriateness of pre-tax discount rates used for each CGU by comparing to the weighted average cost of capital of the Group and relevant risk factors; and
- (d) performed sensitivity analysis to stress test the key assumptions in the impairment model.

#### **2. Impairment assessment of amounts due from subsidiaries**

As stated in Note 10(f) to the financial statements, certain subsidiaries have impairment indicators and the net carrying amount of the amounts due from these subsidiaries amounted to RM92,971,069 as at 31 December 2023.

We determined this to be a key audit matter because it requires management to exercise significant judgements in determining the probability of default by subsidiaries, appropriate forward-looking information and significant increase in credit risk.

#### ***Audit response***

Our audit procedures included the following:

- (a) assessed the probability of default applied by the Company against external market sources of data;
- (b) assessed the appropriateness of the indicators of significant increase in credit risk applied by management and the resultant basis for classification of exposure into respective stages for the amounts owing by the subsidiaries; and
- (c) assessed actual loss events subsequent to the end of reporting period for its relationship with the indicators of significant increase in credit risk applied by management.

#### **Information Other than the Financial Statements and Auditors' Report Thereon**

The Directors of the Company are responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements of the Group and of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### **Responsibilities of the Directors for the Financial Statements**

The Directors of the Company are responsible for the preparation of financial statements of the Group and of the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, IFRS Accounting Standards, and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Company, the Directors are responsible for assessing the ability of the Group and of the Company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

# INDEPENDENT AUDITORS' REPORT

## TO THE MEMBERS OF BOX-PAK (MALAYSIA) BHD. (INCORPORATED IN MALAYSIA)

### Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Group and the Company.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group or of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- (f) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

# **INDEPENDENT AUDITORS' REPORT**

## **TO THE MEMBERS OF BOX-PAK (MALAYSIA) BHD. (INCORPORATED IN MALAYSIA)**

### **Auditors' Responsibilities for the Audit of the Financial Statements (continued)**

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### **Report on Other Legal and Regulatory Requirements**

In accordance with the requirements of the Companies Act 2016 in Malaysia, we report that the subsidiaries of which we have not acted as auditors, are disclosed in Note 8 to the financial statements.

### **Other Matters**

This report is made solely to the members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

## 5. PROPERTY, PLANT AND EQUIPMENT (continued)

- (a) All items of property, plant and equipment are initially recorded at cost. After initial recognition, property, plant and equipment are stated at cost less any accumulated depreciation and any accumulated impairment losses.

Assets under construction are not depreciated until such time when the assets are ready for use.

Depreciation is calculated to write off the cost of the assets to their residual values on a straight-line basis over their estimated useful lives. The estimated useful lives represent common life expectancies applied in the industry within which the Group operates.

Leasehold buildings	2% - 3%
Plant, machinery and equipment	6% - 10%
Furniture, fittings and office equipment	10% - 50%
Motor vehicles	10% - 20%
Spare parts	10% - 50%

- (b) Spare parts, which are held for use in the production and supply of goods are expected to be used in more than one period, and thus are classified as property, plant and equipment. The spare parts are depreciated over their useful lives from the date of acquisition.

- (c) Impairment testing of property, plant and equipment

The Group and the Company assessed whether there were any indicators of impairment during the financial year. In doing this, management considered the current environment and performance of the Cash Generating Units ("CGUs"). Management considered the continued losses generated in certain operating subsidiaries in the current financial year as impairment indicators. These subsidiaries collectively held RM84,161,228 (2022: RM113,235,986) as the carrying amount of property, plant and equipment as at the end of the reporting period.

A CGU's recoverable amount is determined as being the higher of the CGU's fair value less costs of disposal and its value-in-use. Where the value-in-use model is used, management has exercised significant judgement and made estimates about the future results and key assumptions applied to cash flow projections of the CGUs. These key assumptions include forecast growth in future revenues and operating profit margins, as well as determining an appropriate pre-tax discount rate and growth rates, which are, among others, dependent on forecasted economic conditions.

Pre-tax discount rates ranging from 8.7% to 12.0% (2022: 8.6% to 12.0%) were applied over the projection periods in determining the recoverable amounts of the CGUs.

In the current financial year, the management has determined that the recoverable amounts of the CGUs are in excess of the carrying amounts of the property, plant and equipment and no further impairment has been recorded.

With regard to the assessment of value-in-use of the CGUs, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying amounts of the CGUs to further materially exceed their recoverable amounts.

## 6. RIGHT-OF-USE ASSETS AND LEASE LIABILITIES (continued)

### 6.1 Right-of-use assets (continued)

- (a) The right-of-use assets are initially measured at cost, which comprise the initial amount of the lease liabilities adjusted for any lease payments made at or before the commencement date of the leases.

After initial recognition, right-of-use assets are stated at cost less accumulated depreciation and any accumulated impairment losses, and adjusted for any remeasurement of the lease liabilities.

The right-of-use assets are depreciated on the straight-line basis over the earlier of the estimated useful lives of the right-of-use assets or the end of the land use rights term. The terms of right-of-use assets are as follows:

Land use rights	Up to 55 years
Buildings	2 to 5 years
Equipment	2 to 6 years
Motor vehicles	2 to 5 years

- (b) The land use rights of the Group and of the Company have remaining tenures of 23 to 51 (2022: 24 to 52) years and 51 (2022: 52) years respectively.
- (c) The Group and the Company have certain leases of forklifts and hostels with lease term of twelve (12) months or less. The Group and the Company apply the “short-term lease” exemption for these leases.
- (d) During the financial year, the Group and the Company recognised the following right-of-use assets and related obligations and made the following cash payments:

As at the end of the reporting period, the Group and the Company had total cash outflow for leases of RM7,754,064 (2022: RM6,036,889) and RM611,191 (2022: RM544,943) respectively.

(f) Impairment testing on right-of-use assets

The Group and the Company assessed whether there were any indicators of impairment during the financial year. In doing this, management considered the current environment and performance of the CGUs. Management considered the continued losses generated in certain operating subsidiaries in the current financial year as impairment indicators. These subsidiaries collectively held RM15,608,927 (2022: RM39,589,108) as the carrying amount of right-of-use assets as at the end of reporting period.

A CGU's recoverable amount is determined as being the higher of the CGU's fair value less costs of disposal and its value-in-use. Where the value-in-use model is used, management has exercised significant judgement and made estimates about the future results and key assumptions applied to cash flow projections of the CGUs. These key assumptions include forecast growth in future revenues and operating profit margins, as well as determining an appropriate pre-tax discount rate and growth rate, which are, among others, dependent on forecasted economic conditions.

## 6. RIGHT-OF-USE ASSETS AND LEASE LIABILITIES (continued)

### 6.1 Right-of-use assets (continued)

- (f) Impairment testing on right-of-use assets (continued)

Pre-tax discount rates ranging from 8.7% to 12.0% (2022: 8.6% to 12.0%) were applied over the projection periods in determining the recoverable amounts of the CGUs.

In the current financial year, the management has determined that the recoverable amounts of the CGUs are in excess of the carrying amounts of the right-of-use assets and no further impairment has been recorded.

With regard to the assessment of value-in-use of the CGUs, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying amounts of the CGUs to further materially exceed their recoverable amounts.

<sup>(4)</sup> The accounting year end of this subsidiary is 31 March. The Company has been granted approval by the Companies Commission of Malaysia for the subsidiary to continue to have a financial year, which does not coincide with the Company in relation to the financial year ended 31 December 2023.

(c) Impairment assessment

The Company assessed whether there were any indicators of impairment during the financial year. In doing this, management considered the current environment and performance of the subsidiaries/CGUs. Management considered the continued losses or shortfall in shareholders' funds in certain operating subsidiaries in the current financial year as impairment indicators. The carrying amounts of costs of investments in these direct and indirect subsidiaries amounted to RM52,933,000 (2022: RM52,933,000) as at the end of the reporting period.

Management has exercised significant judgement and made estimates about the future results and key assumptions applied to cash flow forecasts of the CGUs in determining their recoverable amounts using the value-in-use model. These key assumptions include forecast growth in future revenues and operating profit margins, as well as determining an appropriate pre-tax discount rate and growth rate, which are, among others, dependent on forecasted economic conditions.

# NOTES TO THE FINANCIAL STATEMENTS

## 8. INVESTMENTS IN SUBSIDIARIES (continued)

### (c) Impairment assessment (continued)

Pre-tax discount rates ranging from 8.7% to 12.0% (2022: 8.6% to 12.0%) were applied over the projection periods in determining the recoverable amounts of the CGUs.

In the current financial year, the management has determined that the recoverable amounts of these subsidiaries are in excess of the net carrying amounts of costs of investments and no further impairment has been recorded.

With regard to the assessment of value-in-use of the CGUs, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying amounts of the CGUs to further materially exceed their recoverable amounts.

## 9. PREPAYMENTS

These are prepayments for insurance, levies and user licenses.

## NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2023

### 10. AMOUNTS DUE FROM SUBSIDIARIES (continued)

- (f) The Company assessed whether there were any indicators of impairment during the financial year. In doing this, management considered the current environment and performance of the subsidiaries/CGUs. Management had assessed the amounts due from certain subsidiaries amounting to RM92,971,069 (2022: RM80,130,807) at the end of the reporting date with impairment indicators.

Impairment for receivables from subsidiaries are recognised based on the general approach as disclosed in Note 12(g) to the financial statements.

It requires management to exercise significant judgement in determining the probability of default by subsidiaries, appropriate forward-looking information and significant increase in credit risk.

The probability of non-payment by the subsidiaries is adjusted by forward-looking information as stated in Note 12(c) and multiplied by the amount of the expected loss arising from default to determine the twelve (12) month or lifetime expected credit loss for the subsidiaries.

Amounts due from subsidiaries are considered as in default when the subsidiaries do not perform their obligations to make payment within the period granted or allowed.

The credit risk on amounts due from subsidiaries is considered to have increased significantly since initial recognition by the Company when contractual payments are more than 30 days past due.

Movements in the impairment allowance for amounts due from subsidiaries are as follows:

Company	Lifetime expected credit loss - not credit impaired RM	Lifetime expected credit loss - credit impaired RM	Total RM

# NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2023

## 12. TRADE AND OTHER RECEIVABLES (continued)

- (c) Impairment for trade receivables are recognised based on the simplified approach using the lifetime expected credit losses.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of the asset. The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Group and the Company are exposed to credit risk.

The Group and the Company consider credit loss experience, coverage under credit insurance policy and observable data such as current changes and future forecasts in economic conditions to estimate the amount of expected impairment loss. The methodology and assumptions including any forecasts of future economic conditions are reviewed regularly.

During this process, the probability of non-payment by the trade receivables is adjusted by forward-looking information and multiplied by the amount of the expected loss arising from default to determine the lifetime expected credit loss for the trade receivables. For trade receivables, which are reported net, such impairments are recorded in a separate impairment account with the loss being recognised within administrative expenses in the statements of profit or loss. On confirmation that the trade receivable would not be collectable, the gross carrying value of the asset would be written off against the associated impairment.

A receivable is considered as in default when such a customer does not perform their obligation to make payment within the period granted or allowed.

The Group has identified gross domestic product ("GDP"), unemployment rate, inflation rate, consumer price index and producer price index as the key macroeconomic factors.

The reconciliation of movements in allowance for impairment accounts is as follows:

Group	Lifetime expected credit loss allowance RM	Credit impaired RM	Total Allowance RM

(g) Impairment for other receivables is recognised based on the general approach within MFRS 9 using the forward-looking expected credit loss model. The methodology used to determine the amount of the impairment is based on whether there has been a significant increase in credit risk since initial recognition of the financial asset. For those in which the credit risk has not increased significantly since initial recognition of the financial asset, twelve (12) months expected credit losses along with gross interest income are recognised. For those in which credit risk has increased significantly, lifetime expected credit losses along with the gross interest income are recognised. At the end of the reporting period, the Group assesses whether there has been a significant increase in credit risk for financial assets by comparing the risk of default occurring over the expected life with the risk of default since initial recognition.

A receivable is considered as in default when such debtor did not perform their obligation to make payment within the period granted or allowed. Credit impaired refers to individually determined debtors who are in significant financial difficulties and have defaulted on payments to be impaired as at the end of the reporting period. For those that are determined to be credit impaired, lifetime expected credit losses along with interest income on a net basis are recognised.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of the asset, while 12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within the twelve (12) months after the end of the reporting period. The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Group and the Company are exposed to credit risk.

The credit risk on other receivables has increased significantly since initial recognition in the Group and the Company when contractual payments are more than 30 days past due.

The probability of non-payment by other receivables is adjusted for forward-looking information as stated in Note 12(c) and multiplied by the amount of the expected loss arising from default to determine the twelve (12) months or lifetime expected credit loss for the other receivables.

No expected credit loss is recognised arising from other receivables as it is negligible.

The principal actuarial assumptions used are as follows:

	Group and Company	
	2023	2022
	%	%
Discount rate	4.6	3.8
Expected rate of salary increases	5.5	5.5

The discount rate is determined based on the values of AA rated corporate bond yields with 10 to 15 years of maturity.

Significant actuarial assumption for determination of the retirement benefit obligations is the discount rate. The sensitivity analysis below has been determined based on changes to significant assumption, with all other assumptions held constant.

	Group and Company	
	2023	2022
	RM	RM
A 1% increase/decrease in discount rate will decrease/increase the retirement benefit obligations by	133,700	88,313

The sensitivity analysis presented above may not be representative of the actual change in retirement benefit obligations as it is unlikely that the change in assumptions would occur in isolation of one another as some assumptions may be correlated.

For the Malaysian entities, with the gazette of the Finance Act 2021 on 31 December 2021, the carry forward of any unabsorbed tax losses is extended to ten (10) consecutive years of assessment and it is deemed effective from the year of assessment 2019 ("YA 2019"). Any amount which is not utilised at the end of the period of ten (10) years of assessment shall be forfeited.

For the Malaysian entities with effect from YA 2019, the unabsorbed reinvestment allowances will expire after seven (7) consecutive years of assessment from the end of the qualifying period of fifteen (15) consecutive years of assessment commencing from the year of assessment of the first claim.

The Myanmar entity's business activity is conducted in the Thilawa Special Economic Zone and the entity has been granted tax allowance to retrieve the losses for five (5) years after the year of losses incurred under the provision of the Myanmar Special Economic Law, 2014.

The use of tax losses of subsidiaries in other countries is subject to the arrangement of the tax authorities and the tax legislation of the respective countries in which the subsidiaries operate.

## 33. CAPITAL AND FINANCIAL RISK MANAGEMENT (continued)

### (b) Financial risk management (continued)

The following sections provide details regarding the Group's and the Company's exposure to the above mentioned financial risks and the objectives, policies and processes for the management of these risks.

#### (i) Credit risk

Cash deposits and trade receivables could give rise to credit risk, which requires the loss to be recognised if a counter party fails to perform as contracted. The counter parties are reputable institutions and organisations. It is the policy of the Group to monitor the financial standing of these counter parties on an ongoing basis to ensure that the Group is exposed to minimal credit risk.

The primary exposure of the Group to credit risk arises through its trade and other receivables while the primary exposure of the Company is through the amounts due from subsidiaries. The trading terms of the Group with its customers are mainly on credit, except for new customers, where deposits in advance are normally required. The credit period is generally for a period of 14 days, extending up to 120 days for major customers. Each customer has a maximum credit limit and the Group seeks to maintain strict control over its outstanding receivables via a credit control section to minimise credit risk. In addition, receivable balances are monitored on an ongoing basis with the result that the Group's exposure to bad debts is not significant.

During the financial year, the Group and the Company obtained credit insurance to minimise the credit risk exposure.

As at the end of the reporting period, trade receivables of the Group and of the Company amounting to RM17,528,037 (2022: RM15,624,765) and RM6,708,150 (2022: RM9,787,552) respectively are secured by the credit insurance.

The credit risk concentration profile has been disclosed in Note 12(h) to the financial statements.

#### (ii) Liquidity risk

The Group actively manages its debt maturity profile, operating cash flows and the availability of funding so as to ensure that all operating, investing and financing needs are met. In executing its liquidity risk management strategy, the Group measures and forecasts its cash commitments and maintains a level of cash and cash equivalents deemed adequate to finance the activities of the Group.

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group's and the Company's objective is to maintain a balance between continuity of funding and flexibility through the use of stand-by credit facilities. In addition, there are arrangements with the immediate holding company if further funding is required to meet their obligations as and when they fall due.

The analysis of financial instruments by remaining contractual maturities has been disclosed in Notes 6 and 18 to the financial statements.

## 33. CAPITAL AND FINANCIAL RISK MANAGEMENT (continued)

### (b) Financial risk management (continued)

#### (iii) Interest rate risk

The primary interest rate risk of the Group relates to interest-earning deposits and interest-bearing borrowings from financial institutions. The fixed-rate deposits and borrowings of the Group are exposed to a risk of changes in their fair values due to changes in interest rates. The floating rate deposits and borrowings of the Group are exposed to a risk of change in cash flows due to changes in interest rates. The Group borrows in the desired currencies at both fixed and floating rates of interest.

The Group actively reviews its debt portfolio, taking into account the investment holding period and nature of its assets. This strategy allows it to capitalise on cheaper funding in a low interest rate environment and achieve a certain level of protection against rate hikes.

The interest rate profile and sensitivity analysis of interest rate risk have been disclosed in Notes 6, 12, 14, 17 and 18 to the financial statements respectively.

#### (iv) Foreign currency risk

The Group and the Company are exposed to foreign currency risk on transactions that are denominated in currencies other than the functional currencies of the operating entities.

The Group maintains a natural hedge, where possible, by borrowing in the currency of the country in which the investment is located or by borrowing in currencies that match the future revenue stream to be generated from its investments.

The sensitivity analysis for foreign currency risk has been disclosed in Notes 10, 12, 14, 17 and 18 to the financial statements respectively.
